Dear Parent / Carer

Re: Key stage 4 science resources

As you are aware, your daughter is now starting the final phase of her secondary education. As such I would like to remind you and your daughter of the resources that are available.

We are selling revision guides at a cost of £4 each. The revision guides we are selling are for the Core science (year 10 work), Additional science (year 11 work) and Further Additional science (only the students completing the triple science).

These revision guides are really useful resources and will aid your daughter with her science education. They are available to purchase through our school gateway system (details of which have recently been sent to you). If you are unable to pay online please send the payment in an envelope marked FAO Finance Office; name of student; amount; reason for payment.

The VLE has numerous resources available for students to access. This includes:

- Specification details
- Past papers
- Mark schemes
- Examiners reports
- Key words
- Further reading
- Extended question practice

I hope that this clarifies the opportunities available to support your daughter in her learning in science.

Yours faithfully

Chris Applegate
Assistant Head of Science

PRINCIPAL: Lucy Monk
REGIONAL DIRECTOR: Mark Phillips
